1 AIRCRAFT MOVEMENTS

Commercial and Non-Commercial Aircraft Movements	
1.1.1 Annual Total 2007-2020, by Airport and Region	15
1.1.2 Monthly Totals 2020, by Airport and Region	21
Aircraft Movements By Market	
1.2.1 Annual Totals 2007-2020, by Airport and Region	27

2 PASSENGER TRAFFIC

Top 60 Airport Comparisons	
2.1.1 Number of Passengers, Domestic 2020	29
2.1.2 Number of Passengers, Worldwide 2020	30
Commercial Passenger Traffic	
2.2.1 Annual Totals 2007-2020, by Airport and Region	31
2.2.2 Monthly Totals 2020, by Airport and Region	36
Passenger Traffic By Market	
2.3.1 Annual Totals 2007-2020, by Airport and Region	41
Passenger Traffic By Airline	
2.4.1 Top 20 Carriers, 2020 Passengers, by Airport and Region	43
Passenger Traffic By Terminal	
2.5.1 2020 Passengers, Domestic and International by Airport	45
Passenger Demographics	
2.6.1 Profile of Departing Passengers, by Airport and Region	46

3 CARGO TRANSPORT

Top 60 Airport Comparisons	
3.1.1 Revenue Cargo in Short Tons, Top 60 Domestic (ACI) – 2020	49
3.1.2 Revenue Cargo in Short Tons, Top 60 Worldwide (ACI) – 2020	50
Revenue Freight In Short Tons	
3.2.1 Annual Totals 2007-2020, by Airport and Region	51
3.2.2 Monthly Totals 2020, by Airport and Region	52
Regional Freight In Short Tons	
3.3.1 By International Market, Annual Totals 2010-2020, for Region (US Customs)	53
3.3.2 U.S. Trading Districts by Air, 2020 (US Customs)	54
3.3.3 Air Trade Commodities in the NY/NJ Region, 2020 (US Customs)	55
Revenue Freight by Airlines	
3.4.1 Top Carriers 2020, by Airport and Region	56
Revenue Mail in Short Tons	
3.5.1 Annual Totals 2007-2020, by Airport and Region	58
3.5.2 Monthly Totals 2020, by Airport and Region	59

4 GROUND TRANSPORTATION & AIRPORT ECONOMIC IMPACT

Passengers Accessing Airports by Bus & Rail	
4.1.1 Annual Totals 2007-2020, by Airport and Region	61
Paid Parked Cars	
4.2.1 Annual Totals 2007-2020, by Airport and Region	62
Taxi Dispatch Passengers	
4.3.1 Annual Totals 2007-2020, by Airport and Region	63
Ground Transportation Center Bookings	
4.4.1 Annual Totals 2007-2020, by Airport and Region	64
Airport Employment	
4.5.1 Annual Totals 1997-2020, by Airport and Region	65
The Economic Impact of the Aviation Industry	
4.6.1 2020 Totals for the New York/New Jersey Region	66
Credits	67

July 2021

In most years, this introductory note to our annual traffic report takes an in-depth and laudatory look back at activity across our airport system, usually noting all the records we set along the way. In fact, between 2010 and 2019 we had an unbroken string of record-setting years with ever-increasing passenger numbers.

As 2020 began, it too was shaping up as another record year, with all-time highs in passenger totals in January and February.

But then the pandemic touched down.

What followed was unlike any year we and the global community had experienced in a century—when the last pandemic struck, in the days when human flight was still in its infancy.

As a result, there won't be record passenger and cargo numbers in this year's report. The statistics you'll find in the pages that follow serve as stark testimony to the sharpest downturn our industry has ever experienced, one that wiped out decades of growth in a matter of months. By year's end, we lost an astounding 71 percent of passenger traffic—about 100 million forecasted passengers who never materialized.

We weren't alone. Activity at airports across the nation and around the world came to a near-standstill. But although 2020 was heartbreaking and devastating in countless ways, we also accomplished a great deal in the face of so much adversity. As air travel faltered, our employees worked tirelessly with countless stakeholders to respond to the pandemic. We went to work immediately to ensure our airports offered the highest levels of hygiene and safety possible. Those efforts were independently verified as we received certifications from the Global Biorisk Advisory Council and Airports Council International-North America—two leading authorities on airport biohazard risks. And as we learned more about the virus, we stepped up our responses, creating touchless, seamless customer experience improvements in security screening, concessions, gate holds and other areas that would await travelers when they returned.

And eventually, they did. Customers did not return in numbers to which we are accustomed, but they returned just the same, and by year's end, the recovery began to take shape. Our road back may ultimately be measured in years and not months, but we are steadily recovering thanks to the herculean work of all our frontline employees, who gave so much to create this path forward. We take a moment here to honor those individuals whose achievements cannot be measured in statistics, but rather in the realization that without their courageous response, our ongoing recovery could not be taking place.

We also continued to advance the rebuild of our airport system with significant terminal, airfield and ground access improvements being delivered regularly, and with much more to come. Our vision—to be a world-class operator of world-class airports—sharpens in focus with every passing day.

As we publish our Annual Air Traffic Report for 2020, we are already months into 2021. Hopeful signs abound. The recovery continues. Customers are returning to the skies.

We have faced these types of challenges before, following 9/11 and the Great Recession in 2008-2009. We know our airports have shown remarkable resiliency before, and they will again.

The attached statistics are used by the Port Authority's Aviation Department to better understand our airports and the aviation industry, conduct analyses and assist in decision-making as we chart a course for our industry's recovery. This report remains a continuing reflection of the department's desire to keep our stakeholders informed and reaffirms our commitment to achieving regional prosperity through a unified system of airport facilities that offer safe and secure environments, excellent customer experience, and environmentally sustainable and world-class services delivered by a world-class staff.

Marily Mora
Aviation Strategy Officer
Aviation Department
The Port Authority of NY & NJ

John F. Kennedy International Airport

History

- Construction for a new international airport began in 1942 under a New York City contract on the site of the Idlewild Golf Course in Queens, New York City.
- The Port Authority of New York and New Jersey began operating the soon-to-open airport on June 1, 1947, under a lease with the City of New York.
- On July 9, 1948, commercial flights began flying into and out of the newly opened New York International Airport.
- The airport was rededicated John F. Kennedy International Airport on December 24, 1963, in memory of the nation's 35th president.
- On February 7, 1964, the Beatles arrived for the first time in the United States and entertained reporters and the public at a press conference in the former International Arrivals Building. Over the decades, the airport has been a gateway for numerous presidents and dignitaries, including thousands who have arrived throughout the years for the annual United Nations General Assembly.
- In 2000, JFK welcomed its one-billionth passenger.
- In 2004, the Port Authority and the City of New York concluded an agreement that ensures the agency's continued operation of JFK through 2050.
- JFK made airport history on March 19, 2007, when the A380, the world's largest passenger aircraft, touched down on U.S. soil for the first time in a route-proving test, and again on August 1, 2008, when an Emirates Airline A380 landed at JFK—the first regularly scheduled arrival of the A380 in the United States.
- In 2018, just five years after JFK surpassed 50 million annual passengers for the first time in its history, it surpassed 60 million.

Size and Location

JFK covers 4,930 acres, including 880 acres in the Central Terminal Area. The airport has more than 30 miles of roadway. It is located on Jamaica Bay in the southeastern section of Queens County, New York City, 15 miles by highway from midtown Manhattan.

Aviation Role

JFK has been recognized for decades as the premier U.S. gateway for passengers and cargo. JFK is the busiest airport in the New York City metropolitan area, and among the busiest in North America and the world. In 2019, the airport served a record 62.55 million passengers and handled more than 1.3 million tons of cargo. The airport served about 34.3 million international passengers in 2019, also an all-time record and more than any other U.S. airport. In 2020 – a year that saw a sharp decline in air travel worldwide due to the pandemic – JFK served more than 16.6 million passengers and handled more than 1.15 million tons of cargo.

Employment and Economic Impact

About 41,000 people are employed at the airport. The airport contributes more than \$23.5 billion in economic activity to the New York-New Jersey metropolitan region, supporting more than 125,000 total jobs and nearly \$8 billion in annual wages.

Investment

The City of New York invested about \$150 million in the original construction of the airport. Since then, the Port Authority has invested nearly \$8.6 billion in JFK.

Redevelopment

Following New York Governor Andrew Cuomo's "Vision for JFK" announcement in January 2017, the Port Authority began master program and planning efforts to Transform JFK into a unified, interconnected, world-class airport capable of accommodating as many as 100 million annual passengers by 2050. Detailed planning and analysis for roadways, utilities and parking structures continues today. In late 2018, the Port Authority announced that it would enter detailed negotiations with two developer teams for separate new terminal development in the south and northern zones of the airport's Central Terminal Area (CTA). These activities led a program-wide environmental assessment, which was approved by the FAA in 2020 and will allow for the major developments to be constructed. The current timeline calls for the first new terminal gates to be available in the mid-2020s and the first phase of the redevelopment program to deliver the completed projects by the late 2020s. More information is available at www.anewjfk.com.

Central Terminal Area

JFK has six airline terminals surrounded by a dual ring of peripheral taxiways. The original CTA was enlarged from 655 to 880 acres by relocating taxiways to provide needed space for expanding the passenger terminals. There are more than 125 aircraft gates serving the six terminals. The CTA also includes a cogeneration plant that produces the power supply for JFK, and the heating and air conditioning for the entire CTA.

Terminals

- Terminal 1: The Terminal One Group, a consortium of airlines – Air France, Japan Airlines, Korean Air, and Lufthansa – built the 11-gate international Terminal 1 on the site of the old Eastern Airlines Terminal. It opened in 1998.
- Terminal 2: Delta Air Lines operates Terminal 2 and completed the expansion of Terminal 4 during 2013. Delta vacated Terminal 3 when the newly expanded Terminal 4 opened in May 2013. After 50 years of service to JFK, Terminal 3 was demolished. Terminal 3 ramp is now used as an aircraft parking area for 15 planes.
- Terminal 4: The 1.5-million-square-foot, common-use Terminal 4 opened in May 2001. Terminal 4 includes separate levels for departures and arrivals, consolidated ticketing and baggage operations, improved customer facilities, duty-free retail shops, and a wide variety of eateries. A Welcome Center opened in 2009. Delta Air Lines redeveloped a portion of the terminal by adding nine new gates, and other enhancements and amenities, which opened in 2013.
- Terminal 5: JetBlue’s Terminal 5 opened in 2008. The Port Authority provided nearly \$800 million toward the jointly financed, 26-gate, 635,000-square-foot terminal, which is designed to handle up to 20 million passengers per year. In 2012, JetBlue broke ground on T5i, a 145,000-square-foot expansion to accommodate JetBlue international arrivals. The project was completed at the end of 2014.
- Terminal 7: A \$251 million redevelopment project was completed at British Airways’ Terminal 7. The project expanded and reconfigured the terminal for greater efficiency. Improvements included new ticketing and check-in areas, new retail outlets, and a new departure and arrival roadway system.
- Terminal 8: American Airlines’ \$1.2 billion Transformation of Terminal 8 opened in 2007 and serves domestic and international passengers on three concourses. Terminal 8 includes expanded check-in areas, top name-brand shops and eateries, and numerous services.

Roadway Access and Ground Transportation

A roadway configuration in the Central Terminal Area divides the roadway network into five terminal areas so motorists can make direct connections between terminals, parking lots, and airport expressways. In addition to AirTrain JFK, the airport also is served by taxis, airport coaches, and several car rental agencies.

Airtrain JFK

Opened in 2003, the light-rail system connects JFK with the Long Island Rail Road and New York City subway and bus lines. Recent improvements include digital signage, expanded closed-circuit tele vision, upgraded access control security systems and improved customer communications on-board and in stations.

Parking

JFK offers more than 15,000 public parking spaces and includes five garages. E-ZPass Plus, which allows customers to use their E-ZPass to pay for parking, is available in all parking lots and garages, except for the overflow lot. Several customer incentives and conveniences were implemented over the past six years. A reservation system was introduced in 2011, and there are seasonal promotions for discounted parking rates at certain parking garages. These promotion rates are advertised on the Port Authority website.

Cargo

JFK is one of the world’s leading international air cargo centers. The airport offers nearly 4 million square feet of modern, state-of-the-art cargo warehouse and office space. The entire air cargo area is designated as a Foreign-Trade Zone. JFK serves the world’s key air cargo markets through a strong mix of long-haul, direct and nonstop all-cargo aircraft and wide-body passenger aircraft flights.

Runways/Taxiways

- JFK’s runway system consists of two pairs of parallel runways (4L-22R, 4R-22L and 13L-31R, 13R-31L) aligned at right angles. Total runway length is over nine miles.
- Three of the airport’s runways are constructed in concrete.
- All four of the airport’s runways are 200 feet wide to accommodate Aircraft Design Group VI aircraft.
- All runways have high-intensity runway edge lighting, centerline and taxiway exit lighting, and are grooved to improve skid resistance and minimize hydroplaning.
- Taxiways total approximately 45 miles in length with widths of 75 feet or 82 feet. There are shoulders and erosion control pavements on each side of the taxiways. Other features include the taxiway centerline light system and a sign system, illuminated at night to provide directional information for taxiing aircraft.
- The Port Authority invested \$200 million for taxiway and airside rehabilitation to prepare for the A380 aircraft, and more than \$150 million was dedicated to fund technical and customer service initiatives to combat airport delays.
- Between 2010 and 2015, the Port Authority invested nearly \$600 million to completely reconstruct the two JFK’s departure runways, 13R-31L (Bay Runway) and 4L-22R.

- Both runways were reconstructed in concrete and were widened from a 150- to 200-foot width to accommodate operations of Design Group VI Aircraft, increase operational efficiencies, and enhance safety. The runways received new entrances for departing aircraft and new high-speed exits for landing aircraft, which enabled swifter departures and easier access from runways to terminal gates, saving time on the ground for all passengers at JFK.
- In 2017, the Port Authority invested \$106 million to rehabilitate Runway 4R-22L, one of the two arrival runways at JFK. The project provided for rehabilitation of the runway pavement, replacement of electrical infrastructure, and realignment of certain taxiways to allow for faster runway exiting after landing and saving taxing time to terminal gates.
- In 2019, the Port Authority completed a \$355 million rehabilitation of JFK other primary arrival runway, 13L-31R, which

included the addition of a high-speed taxiway, navigational aids, new energy-efficient lighting, and widening to 200 feet. The project used specialized concrete for long-term durability to minimize future operational impacts.

Air Traffic Control Tower

The 321-foot air traffic control tower opened in 1994 and includes communications, radar, and wind shear alert systems.

Hotel

The Port Authority completed \$20 million in restoration and preservation measures for JFK's historic TWA Flight Center in advance of an adaptive re-use redevelopment program, which created hotel space and related services in the Central Terminal Area. The 512-room TWA Hotel opened in May 2019. Visit www.twahotel.com for more information.

INVESTMENT & REDEVELOPMENT

In October 2018, Governor Cuomo announced a \$13 billion investment to Transform JFK. The reimagined airport will be anchored by two new world-class international terminal complexes on the airport's north and south sides.

Newark Liberty International Airport

History

- The metropolitan area's first major airport, Newark Airport, was built by the City of Newark on 68 acres of marshland. After the airport's opening on October 1, 1928, it quickly became the world's busiest commercial airport.
- During World War II, the airport was operated by the Army Air Corps.
- After the Port Authority assumed responsibility for Newark Airport's operations on March 22, 1948, the agency added an instrument runway, a passenger terminal, a control tower, and an air cargo center.
- The Central Terminal Area was constructed and opened in 1973. Other construction during the early 1970s included the Port Authority Administration Building, the Central Heating and Refrigeration Plant, and taxiways and roadways.
- In 1989, a two-building maintenance complex opened.
- In 1996, the International Arrivals Facility opened in Terminal B, and the automated monorail began operating between terminals and parking lots.
- Terminal C opened in 1988 as the hub of Continental Airlines, and later underwent numerous upgrades.
- In 2001, the monorail was extended to the Northeast Corridor and renamed AirTrain Newark.
- In 2002, the airport was renamed Newark Liberty International Airport to memorialize all those who lost their lives on September 11, 2001.
- In 2019, the Port Authority and the City of Newark agreed to extend the lease through 2075.

Size and Location

Newark Liberty International Airport (EWR) occupies 2,027 acres, including a 425-acre Central Terminal Area, at roughly sea-level elevation. It is bordered by the New Jersey Turnpike, Interstate 78 and U.S. Routes 1-9 in the cities of Newark and Elizabeth, N.J. and resides in both the counties of Essex and Union and the cities of Newark and Elizabeth.

Aviation Role

EWR is among the busiest North American and international airports. In 2019, EWR served more than 46 million passengers, an all-time record. In 2020 – a year that saw a sharp decline in air travel worldwide due to the pandemic – Newark served about 15.9 million passengers.

Employment And Economic Impact

About 22,000 people are employed at Newark Airport. The airport contributes more than \$14.5 billion in annual economic activity to the New York-New Jersey metropolitan region, supporting more than 74,000 total jobs and nearly \$4.9 billion in annual wages.

Investment

The City of Newark spent more than \$8.2 million on the construction and development of Newark Airport, and the U.S. government spent more than \$15.1 million prior to 1948. Since

assuming the airport's lease in 1948, the Port Authority has invested nearly \$7.4 billion at the airport.

Redevelopment

A \$2.7 billion program is under way to replace Terminal A, provide associated roadway and airside improvements, and a new parking garage which includes both public parking and a consolidated rental car (ConRac) facility. The program broke ground in 2017 with construction of three bridges connecting the new Terminal A to the roadway system. The new terminal is slated to have a partial opening in mid-2022 with the full opening by the end of 2022. ConRac will have a partial opening of public parking in late 2021 with a full opening in late 2022.

Central Terminal Area (CTA)

The 425-acre oval Central Terminal Area was built as part of a large-scale airport redevelopment program in the 1960s and early 1970s. The CTA consists of three passenger terminals: A, B, and C, and a first-class, ten-story, 585-room hotel with meeting rooms, a fitness center, two restaurants and a bar.

Passenger Terminals

- Construction of Terminal A began in October 1967, and the facility opened in August 1973. With 25 gates, the terminal branches out into three circular satellite buildings. The satellites contain flight departure lounges, and airline and passenger service facilities. The main terminal building measures approximately 800 by 165 feet, and includes a Welcome Center. A new terminal and related infrastructure is under construction and will replace the existing terminal beginning in 2022.
- Terminal B's modernization expanded the two-level facility into three levels. Highlights include inline baggage screening systems and passenger screening systems, a baggage claim hall, departure areas, ticket counters, additional passenger lounges and concessions, and a Welcome Center. Terminal B has 15

INVESTMENT & REDEVELOPMENT

Located in a new site on the airport property, the new Terminal One eventually will replace the existing Terminal A, the airport's oldest terminal.

international and 10 domestic gates. In 2019, the Port Authority Board of Commissioners authorized \$35 million for vision and master planning initiatives that would allow for the future replacement of Terminal B with a new world-class Terminal Two.

- Terminal C opened in 1988. Continental Airlines' Global Gateway project in 2001 added 600,000 square feet of space and turned the facility into a three-level terminal with two levels for departures. The terminal has a total of 52 gates, a huge retail and concessions space, and U.S. Customs facilities. The state-of-the-art International Arrivals Facility, also completed by Continental, added another 1,500-passengers-per-hour arrival capacity to Newark Liberty. A Welcome Center also was added. In 2010, Continental merged with United Airlines.

Roadways

To reduce congestion and improve airport access, roadways were widened and reconfigured in the passenger terminal area and airport entrances, giving vehicles the option to bypass terminals and proceed directly to parking areas.

Airtrain Newark

AirTrain Newark, the airport's automated monorail, opened for service on-airport between terminals and parking lots in 1996. The system was extended to a new station on the Northeast Corridor

Rail Line in 2001, providing passengers with connections to NJ Transit and Amtrak trains for links between the airport and New York City, Philadelphia, points across New Jersey, and beyond.

In October 2019, the Board provided a \$2.05 billion authorization to replace the existing rail system with a completely new AirTrain. In May 2021, the Port Authority issued a Request for Proposals to four teams that have been shortlisted to compete for a contract to design, build, operate and maintain the new AirTrain. The four teams were deemed qualified after a thorough technical review of Statements of Qualifications that included financial capability, past project experience and team approach and structure, and approach to customer experience, among other factors.

Parking

The airport offers more than 13,100 parking spaces and features a free 100-space Cell Phone Lot. In addition to two short-term surface lots in the CTA (A and B) and a remote long-term parking lot (P6), EWR has two parking garages: P4, a six-level facility at the AirTrain Station that offers ten charging stations for electric vehicles, and the C garage, which is located across from Terminal C. All lots accept E-ZPass Plus, which allows customers to use their E-ZPass to pay for parking, and customers can pre-book parking using the online Parking Reservation System. Effective June 1, 2021 all lots went to a cashless system.

a crosswind runway, 11-29, which supports precision instrument approaches only on Runway 11. Runway 4R-22L is 10,000 feet long, Runway 4L-22R is 11,000 feet long, and Runway 11-29 is 6,726 feet long. All three runways are 150 feet wide. Both of the parallel runways have displaced thresholds to reduce community noise impacts. Visual aids include high-intensity edge lights, LED centerline and touchdown zone lighting, and high-speed exit taxiway centerline lighting. More than 12 miles of 75-foot-wide taxiways link the three runways with the central terminal and cargo areas. A \$42 million rehabilitation of Runway 4R-22L was completed in 2012, and a \$97 million rehabilitation of Runway 4L-22R, including the construction of multi-entrance and cross taxiways was completed in 2014. Runway 4R-22L changed its approach lighting system to an ALSF-2, and additional high-speeds P2 and P3 were completed in 2013. Runway 4R-22L also was upgraded to a Cat III approach system allowing for landings in poor weather conditions in 2013. The rehabilitation of Runway 11-29 is expected to be completed in 2021 and cost approximately \$46 million. During the rehabilitation of Runway 11-29, incandescent runway lighting was converted to LED lighting.

Port Authority Administration Building

Reconstruction of the airport's original 1935 Central Terminal Building, which is now a National Historic Landmark, was completed in 2002. Now designated Building One, this 100,000-square-foot facility now serves as the Port Authority's Administration Building, hosting airport management, operations, program management, the Port Authority Police Command, Aircraft Rescue and Firefighting (ARFF), and an emergency operations center (EOC).

Air Traffic Control Tower

A 325-foot air traffic control tower was commissioned in 2003, the fourth in the airport's history. The rooftop of Building One, the Port Authority Administration Building, features what is believed to be the first air traffic control tower ever built. The first air route traffic control center was also established on the airport in 1935.

Cargo

The airport is the overnight express package center for the NY/ NJ region, offering a full range of short-, medium-, and long-haul services to domestic and international destinations. In 2010, FedEx agreed to continue hub operations at Newark Liberty and committed to a 20-year lease extension. FedEx installed a rooftop solar electric system to provide more than 15 percent of the hub's energy needs. Newark Liberty handled about 825,000 tons of cargo in 2019 and nearly 700,000 tons in 2020.

Runways and Taxiways

The airport has two parallel runways, 4R-22L and 4L-22R, which support precision instrument approaches at all four ends, and

History

- At the turn of the 20th century, the airport site, then commonly known as North Beach, was occupied by the Gala Amusement Park.
- In 1929, the 105-acre site was purchased by the Curtiss-Wright Co. and developed into a private flying field. Originally called the Glenn H. Curtiss Airport, it later became known as Curtiss-Wright Field.
- The City of New York purchased Curtiss-Wright Field in 1935 and renamed it North Beach Airport. On September 9, 1937, ground was broken for a new airport, which, on October 15, 1939, was dedicated as New York City Municipal Airport.
- Eighteen days later, on November 2, 1939, the airport was renamed New York Municipal Airport-LaGuardia Field to honor New York City's Mayor, Fiorello LaGuardia.
- On December 2, 1939, the airport opened to commercial traffic. It soon became known simply as LaGuardia Airport.
- The Port Authority of New York and New Jersey began operating LaGuardia Airport in 1947.

Size and Location

LaGuardia Airport covers 680 acres. It borders Flushing and Bowery bays in the northwestern section of Queens County, New York City, about eight miles by highway from midtown Manhattan.

Aviation Role

LaGuardia Airport is one of the nation's leading domestic gateways for business and leisure travel, and is the primary business/short-haul airport for New York City. LaGuardia Airport which relative to its size has held the distinction of being the most efficient airport in the world, handling more passengers per acre per year than any other airport, served a record 31.1 million passengers in 2019. In 2020 – a year that saw a sharp decline in air travel worldwide due to the pandemic – LaGuardia served more than 8.2 million passengers.

Employment and Economic Impact

LaGuardia Airport employs nearly 14,000 people, and plays a critical role in addressing the region's transportation needs, as well as fueling the economy. The airport contributes \$6.8 billion in economic activity to the New York-New Jersey metropolitan region, supporting nearly 38,000 total jobs and more than \$2.3 billion in annual wages.

Investment

Original construction by the City of New York cost \$40 million. The Port Authority's total capital investment in the airport to date is nearly \$5.4 billion.

Redevelopment

Construction is well under way for the multibillion dollar redevelopment of Terminal B and Terminal C, including related airport infrastructure. A new electrical substation provides a more reliable and robust source of power for the airport. Hangars 2 and 4 located just east of Terminal B were demolished in anticipation of redevelopment construction. Additionally, parking lot P2 in front of Terminal B was demolished to make way for the new Terminal B head house, which opened in June 2020. In 2010, the Port

AIRPORT INFRASTRUCTURE

Authority completed the airport's Police Crisis Command Center and Aircraft Rescue and Firefighting (ARFF) Facility and the Federal Aviation Administration (FAA) began operating from a new tower. In December 2018, a new Central Heating & Refrigeration Plant (CHRP) located on the east side of the new Terminal B Headhouse opened.

On December 1, 2018, the East Concourse of the new Terminal B opened. The 250,000 square-foot, 18-gate, light-filled new concourse is currently occupied by Air Canada, American Airlines, Southwest Airlines and United Airlines. The opening of this concourse is part of the \$8 billion Transformation of LaGuardia Airport into a unified 21st century terminal system, providing a world-class passenger experience and featuring modern customer amenities, state-of-the-art architecture and more spacious gate areas.

Delta Air Lines is currently building a new Terminal C. The new Terminal C and its four concourses, situated on the east side of the airport, will provide almost 1.2 million square feet of space for passengers. Designed for speed and efficiency, the new terminal will allow customers to check-in and drop bags at every entrance into the terminal before proceeding directly to the security checkpoint. Dedicated check-in facilities will be available for premium customers while the new Sky Club and outdoor Sky Deck will feature expansive views of the airfield. Within its elegant interior, passengers will have access to larger gate hold rooms with more seating, in-seat power at all seats, as well as increased circulation space for boarding the aircraft and transferring between gates.

In November 2019, the easternmost concourse of the new Terminal C opened to the public. It is approximately 105,000 square feet and features seven gates. Its floor-to-ceiling windows provide astonishing views of Citi Field and Flushing Bay. The concourse contains all the primary electrical and mechanical equipment to serve the entirety of the new Terminal C inclusive of electrical equipment, chillers, boilers, cooling towers and even an ice-making and storage system sustainability initiative whereby the new terminal's chillers will run overnight when electrical demand is low and then use the ice created overnight to cool the building during peak daytime hours.

Passenger Terminals

- Originally known as the Overseas Terminal, then the Marine Air Terminal (MAT), Terminal A is the original airport terminal building. It served international flights on flying boats through the 1940s. General aviation also operates from the terminal through a fixed-base operator. In 1995, the MAT was designated an historic landmark. A \$7 million restoration of the terminal was completed in 2004. On December 9, 2017, JetBlue Airways moved into Terminal A.
- Dedicated on April 17, 1964, Terminal B serves Air Canada, American Airlines, American Shuttle, Southwest Airlines and United Airlines. It is operated by LaGuardia Gateway Partners (LGP), a consortium company of airport experts. The 1964 version of Terminal B was 1,300 feet long and 180 feet wide, with approximately 835,000 square feet of floor space. Originally constructed at a cost of \$36 million and then expanded and modernized for \$340 million in the 1990s, the terminal consisted of a four-story central section with two three-story wings. LGP is currently building the new Terminal B, which will increase the terminal's size from 835,000 square feet to 1,310,000 square feet, and will be designed to accommodate 17.5 million people annually, with 35 aircraft contact gates. The frontage will have three levels as opposed to the current two, and one of the levels will be for high-occupancy vehicles. The new terminal is scheduled for completion in 2022.
- Opened in September 1992 and costing \$200 million, Terminal C comprises approximately 300,000 square feet of space with 21 aircraft contact gates. Operated by Delta Air Lines, the terminal features an innovative mix of food, retail, and concessions integrated into the gate holdroom areas and a Welcome Center on the arrivals level. Spirit Airlines (Departures) and Frontier Airways (Departures) are now based in the terminal.

In 2017, Delta Air Lines started construction of a new Terminal C that will replace the current Terminal C & D. The purpose of the new Terminal C is to improve aircraft operations & reduce delays to enable airlines to safely & effectively meet passenger demand at acceptable levels of service. The terminal will have improved passenger processing, concessions and retail options, and sufficient electrical capacity to provide reliable service. The terminal is scheduled for completion in 2026.

- Terminal D, which consists of 10 gates, opened at the east end of the airport in June 1983. It is operated by Delta Air Lines and hosts Delta Air Lines, Frontier Airlines (Arrivals), Spirit Airlines (Arrivals) and WestJet. In 2010, Delta enhanced and expanded the terminal's food, retail, and concessions options, and the Port Authority opened a Welcome Center on the arrivals level. Delta expanded its operations into Terminal C following its takeover of the US Airways lease of Terminal C in 2011 and invested nearly \$100 million in its terminal complex to improve customer access, speed baggage handling, and improve the concessions and customer service experience. In 2012, Delta opened a 600-foot-long enclosed walkway connecting Terminals C and D.

AirTrain LaGuardia

The AirTrain LaGuardia project – currently in the environmental review process – would allow for the first time a rail mass Transit connection to the airport via a new station at Willets Point. It would provide travelers with a 30-minute trip from midtown Manhattan. In October 2019, the Board provided a \$2.05 billion authorization to develop AirTrain LGA, which would connect the

airport with a new station at Willets Point linked to enhanced Long Island Rail Road service to and from New York City. Construction of the AirTrain is dependent upon the FAA's issuance of the Record of Decision.

Parking

LaGuardia Airport offers about 3,900 public parking spaces with, E-Z Pass Plus and Express Pay machines in all parking garages. In 2018, a new 3,100-space Terminal B Parking Garage opened for use. The seven-level garage connects directly with Terminal B. The garage also is used to stage and pick up passengers using for-hire vehicles from Terminal B. When the garage opened, the airport also launched a first-of-its-kind parking pre-booking website that allows customers to reserve a guaranteed, discounted garage parking space.

Runways

There are two main runways, 4-22 and 13-31. Each is 7,000 feet long by 150 feet wide. In a \$40 million project completed in 1967 by the Port Authority, both runways were extended over the bays around the airport to their present lengths. The runway extensions are supported upon a 50-acre, L-shaped, pile-supported concrete deck structure. All runways have high-intensity runway edge lighting, centerline, and taxiway exit lighting and are grooved for added traction during wet weather. Touchdown zone lighting was added on Runway 13 in 2005 and on Runways 4 and 22 in 2009 as part of the runway rehabilitation programs. As part of an FAA Runway Safety Area project, two new Engineered Materials Arresting Systems (EMAS) beds were installed on Runways 4 and 31 in 2015.

Air Traffic Control Tower

The Federal Aviation Administration commissioned a new 233-foot-tall, state-of-the-art air traffic control tower in October 2010. The new tower features the latest aviation technology, including a system that tracks the surface movement of aircraft and vehicles, enhancing safety and efficiency. The \$100 million tower replaced an iconic tower that had served the airport since 1964.

New York Stewart International Airport

History

- In 1930, Archie Stewart, an aviation buff and descendant of prominent local dairy farmer Lachlan Stewart, along with his uncle, Samuel Lachlan Stewart, donated 220 acres of land to the City of Newburgh to be used as an airport.
- In 1934, Douglas MacArthur proposed flight training for cadets, and the City of Newburgh Transferred the land to the U.S. government for \$1. Construction began and a small dirt airstrip was cleared and graded.
- In 1939, the U.S. Military Academy at West Point built the first airfield at Stewart for cadet aviation training. The north entrance to the USMA was named after the old Stewart farm, “Stoney Lonesome.”
- In 1948, the airfield became Stewart Air Force Base.
- In 1970, Stewart Airport was acquired by the State of New York. Operating responsibility was later Transferred to the New York State Department of Transportation (DOT).
- In the 1980s, several business enterprises began operations at Stewart after the DOT and Urban Development Corporation began planning for the development of the airport.
- In 1980, Runway 9-27 is expanded to nearly 12,000 feet in length, allowing it to accommodate any large aircraft in the world.
- In 1981, U.S. hostages held in Iran returned to the United States via Stewart Airport.
- In 1990, scheduled air carrier service began as American Airlines offered the first commercial flights.
- On March 31, 2000, Stewart Airport became the nation’s first privatized commercial airport under a 99-year lease agreement with National Express.
- On November 1, 2007, the Port Authority purchased the remaining 93 years of the operating lease for \$78.5 million.

- On June 15, 2017, the airport welcomed its first-ever scheduled nonstop Transatlantic arrival: a Norwegian Air flight from Edinburgh, Scotland.
- On February 21, 2018, the Port Authority announced the airport was being renamed New York Stewart International Airport as part of an upgrade and modernization program. The new name will make it significantly easier for travelers to identify the airport’s geographical location,

Size and Location

Stewart Airport covers 2,400 acres. It is located at the Intersection of the New York State Thruway (Interstate 87) and Interstate 84, in Newburgh/New Windsor in Orange County, New York, less than 60 miles north of Manhattan.

Aviation Role

Stewart Airport is an economical, convenient alternative to the New York/New Jersey metropolitan region’s airports. Several commercial and charter airlines operate at the airport, offering direct access to a number of major U.S. hubs with connections to virtually anywhere in the world. In 2019, Stewart served about 530,000 passengers and handled more than 22,00 tons of cargo. In 2020 – a year that saw a sharp decline in air travel worldwide due to the pandemic – Stewart handled served about 97,400 passengers and handled more than 24,100 tons of cargo.

Employment and Economic Impact

The airport contributed \$145 million in economic activity to its region, and supported 839 jobs and \$53 million in annual wages. More than half the capital projects initiated by the Port Authority have been awarded to local firms and contractors.

Investment

A \$100 million project that rehabilitated and modernized both runways was completed in mid-2015, representing the largest investment ever made in a single project in Stewart’s history. Since the Port Authority took over Stewart Airport in November 2007, it has invested more than \$218 million to make improvements.

Redevelopment

In 1991, Stewart International became the first facility to receive \$5 million in funding under the Federal Aviation Administration’s (FAA) Military Airport Program for capital improvements to airports that were formerly military facilities or military/civil aircraft-use facilities. That same year, the FAA awarded Stewart a \$900,000 grant to fund a master plan update, conduct an environmental review, and prepare a noise study. The airport also received \$13 million in federal funding for infrastructure rehabilitation. In 1992, the FAA awarded another \$3 million for terminal expansion and redesign. A 50,000-square-foot air cargo building opened in 1990. In 2007, the Port Authority initiated its redevelopment program, whose upgrades include the complete repaving of both of the airport’s runways as part of a \$100 million project – the largest in the airport’s history – and a new Federal Inspection Services facility to accommodate international flights. In December 2011, the Port Authority Board of Commissioners approved an expansion of the airport’s passenger terminal. The Port Authority built a new \$10 million regional crime lab for the New York State Police as part of an agreement that ensures the police force continues to guard and protect the airport. The lab opened in

2015. A \$37 million project to expand the terminal and create a permanent Federal Inspection Service facility for U.S. Customs and Border Protection was completed in 2020.

Passenger Terminal

Stewart Airport's terminal features an expansive lobby with 37 check-in stations, several check-in kiosks, shared-use terminal equipment, a checkpoint lane with the latest generation AIT full-body scanner, two Explosive Detection System baggage screening systems, and a new Federal Inspection Service facility to efficiently process international arrivals. The terminal also includes seven passenger gates and jet-boarding bridges, ticket counters, an electronic flight information display system, a spacious baggage claim area, and car rental agency counters. The concourse features concessions, ATMs, and free wi-fi service.

Roadway Access and Ground Transportation

The MetroNorth-Port Jervis rail line offers a direct link to Secaucus, N.J., from the Salisbury Mills station. The Hudson Line provides a direct link to Grand Central Terminal from the Beacon station. Amtrak service is provided from Poughkeepsie and Croton-Harmon. Some area hotels offer free shuttle service. Car rental agencies are located in the passenger terminal. The Newburgh-Beacon Shuttle offers weekday service from Stewart Airport to the Metro-North Hudson Line at the Beacon train station.

Parking

The airport offers approximately 2,000 parking spaces in short- and long-term lots within walking distance of the terminal.

Cargo

Stewart International maintains 54,300 square feet of air cargo facilities. The airport handles a variety of cargo, including oversized mail freight, express packages and livestock. The airport is home to the New York Animal Import Center. Fed Ex, UPS and Kalitta Air operate regularly scheduled flights at the airport. A USDA inspection facility is located on the airport.

Runways

Stewart Airport has two runways: Runway 9-27 is 11,817 feet long and Runway 16-34 is 6,004 feet long. Both runways are 150 feet wide and were completely repaved in 2014.

Air Traffic Control Tower

A state-of-the-art control tower was commissioned by the FAA in 2006 and is open 24 hours a day.

History

- Teterboro Airport is the oldest operating airport in the New York City metropolitan region.
- Walter C. Teter acquired the property in 1917, and the first flight took place in 1919.
- During World War I, North American Aviation operated a manufacturing plant on the site. After the war, the airport served as a base of operation for Anthony Fokker, the Dutch aircraft designer.
- During World War II, the U.S. Army and U.S. Air Force operated the airport.
- The Port Authority purchased the airport on April 1, 1949, from Fred L. Wehran, a private owner.
- The airport was leased to Pan Am World Airways by the Port Authority in 1970. The airport lease then passed to its successor organization, Johnson Controls, until December 1, 2000, when the Port Authority re-assumed full responsibility for the operation of the airport.

Size and Location

Teterboro Airport covers 827 acres. It borders the municipalities of Teterboro, Hasbrouck Heights, Little Ferry, Moonachie, and Wood-Ridge in Bergen County, N.J., with its northern border on U.S. Highway 46 and its southern border on Moonachie Avenue.

Aviation Role

Teterboro Airport, designated as a reliever airport for general aviation in the New York-New Jersey region, is a 24-hour public-use facility that offers visual, non-precision, and all-weather precision landing capabilities. The airport does not permit scheduled commercial operations, and prohibits aircraft operating with weights in excess of 100,000 pounds.

Employment And Economic Impact

Teterboro Airport supports more than 4,900 jobs paying \$352 million in annual wages, and generates nearly \$1.15 billion in annual sales activity

Investment

The Port Authority has invested more than \$425 million to upgrade the airport's facilities and open new areas of service to the aviation community.

Sustainability

The airport has been replacing its incandescent lighting with LED lighting. By the end of 2023, about 50 percent of incandescent lights will be converted. In addition, several fixed based operators have installed solar panels on their facilities, and many are moving toward converting to electronic ground support equipment.

Business Services

- Fixed-Based Operations – Teterboro Airport is served by four fixed-based operators that operate passenger terminals and provide a range of services for private, corporate and general aviation aircraft.

- Charter/Aircraft Leasing – Companies can charter an aircraft either to supplement their own aircraft or to travel if they do not own an airplane.
- Cargo – Couriers and small package cargo shippers operate at Teterboro Airport.
- Public Service – Teterboro Airport serves as a receiving point for hearts and other human organs used for life-saving transplant operations performed at medical centers throughout the region.
- International Travel – US Customs & Border Protection (CBP) services are available.

Facilities

Twenty-three hangars at the airport have a total area of approximately 572,000 square feet. One large building with an area of approximately 134,400 square feet includes the airport management office. Additional office and shop space at fixed-base operator locations totals about 252,000 square feet. Aircraft rescue and firefighting, operations, and maintenance facilities are located at the airport.

Runways and Taxiways

Runway 6-24 (NE/SW) is 6,013 feet long and 150 feet wide, and is equipped with High Intensity Runway Edge Lights (HIRL). Runway 6 approach has an Instrument Landing System (ILS), Medium Intensity Approach Lighting System with Runway Alignment Indicator Lights (MALSR) and Runway End Identifier Lights (REILS). Runway 24 approach is equipped with a Precision Approach Path Indicator (PAPI) and REILS. Runway 6-24 underwent a complete rehabilitation in 2010, during which centerline lights were added to the runway and Touchdown Zone (TDZ) lights were added to Runway 6. Runway 6/24 has an EMAS installed at each end. Runway 6/24 is scheduled for rehabilitation in 2023.

Runway 1-19 (North/South) is 7,000 feet long and 150 feet wide, and is equipped with HIRL and REILS. Runway 19 approach has an ILS is equipped with a PAPI and Runway 1 approach is equipped with a Visual Approach Slope Indicator (VASI). Runway 1-19 was repaved and grooved in the summer of 2000, which included the installation of centerline lights and TDZ lights for Runway 19. Runway 1 is the preferred runway for noise abatement procedures. Runway 1-19 was rehabilitated in 2011, which included work to relocate nearby Redneck Avenue to improve the Runway Safety Area with the installation of an EMAS at the runways south end. It is slated for another rehabilitation in 2025.

The airport features approximately 4.2 miles of taxiways. Most are 60 feet wide and all are equipped with centerline lights and edge lighting systems. In addition, a project to restore the airfield storm drainage system began in 2017 with Phase II commencing in 2023.

1990 – 160,307
1980 – 231,017

Air Traffic Control Tower

The control tower, which is open 24 hours a day, was constructed on the east side of the airport by the FAA and went into operation on October 29, 1975. Construction of a new control tower began in 2020 with site preparation. The anticipated commissioning of the new tower is planned for fall 2024.

Community Relations and Noise Abatement

Since 1987, Teterboro Airport has engaged local communities in dialogue on issues of mutual interest through the Teterboro Airport Noise Abatement Advisory Committee (TANAAC). The airport provides airport data and other information to the Committee as well as facilitates access for TANAAC to the Federal

Aviation Administration (FAA) and provides technical advice in support of the Committee's efforts to enhance quality of life for surrounding communities while maintaining the efficiency of airport operations.

Teterboro Airport also has a robust noise abatement program that has been in place since the 1970s. The program is grandfathered from changes in FAA regulations as it predates the Airport Noise and Capacity Act of 1990 (ANCA). The noise abatement program establishes noise limits for operations on its runways that are monitored and tracked. Aircraft that violate the noise limits three times in a two-year period can be banned from the airport. The airport also has a very successful voluntary curfew on nighttime operations from 11 p.m. to 6 a.m.

EWR

Olympia Trails: currently serves Bryant Park, GCT and PABT, formerly served Lower Manhattan and Penn Station.

Express #300 bus: formerly served PABT but absorbed into Olympia Trails.

NJT Rail Services & AirTrain: currently serves Manhattan and various points in New Jersey.

* As of June 2017, EWR AirTrain category captures total AirTrain passengers; prior to June 2017, captures only paid AirTrain passengers

Airlink/302 bus: formerly linked Newark Penn Station with EWR but ceased operations with opening of AirTrain.

JFK

New York Airport Service: currently serves GCT and the PABT in Manhattan (formerly known as Carey bus).

AirTrain: currently serves various points in the City of New York and Long Island via LIRR and Subway.

** As of January 2016, JFK AirTrain category captures total AirTrain passengers; prior to January 2016, captures only paid AirTrain passengers (Jamaica & Howard Beach)

LGA

New York Airport Service: currently serves GCT and the PABT in Manhattan (formerly known as Carey bus).

SWF

Leprechaun Bus: currently serves Beacon Metro-North commuter rail station.

Express Bus: currently serves Port Authority Bus Terminal to SWF

Note: n/a = Airport employment figures not available.

Numbers represent individuals who require airport security badges to work at the airport. There are two types of security badges: SIDA and Sterile.

Security Identification Display Area (SIDA) badges are held by those with access to ramps, runways, taxiways, baggage areas, terminals and airline offices.

Sterile Badges are held by those who have access to the passenger terminals, between passenger screening checkpoints and the boarding gates only.

Other airport employees who do not require badges are not included here.

In Millions \$ 2020

Note: Beginning with the 2018 economic impact, the methodology used in calculating the economic impacts was revised to better conform to changes in the aviation industry. This change also includes using the latest IMPLAN Input/Output model. The previous methodology used the Bureau of Economic Analysis Regional Input-Output models (BEA RIMs). As a result, previously estimated economic impacts are not directly comparable.
